Hello, I'm Jun.

I'm a hybrid designer
who is passionate about
**people, communication
& the beauty of life.**

I love pragmatism married up with creativity and pursue a clear communication. I am deeply interested in fundamental aspects of human life and society and love to communicate with people not only in a visual way but also in every possible way. This drives me to cultivate ideas to be realised and conceptualised in strong, generic yet unique ways. I do believe that I support people and make the world better with my love to people and communication.

I am a versatile hybrid designer. Based on strong visual design expertise, I have been constantly expanding my design careers through amazing projects and diverse experiences. My key areas of expertise are **design strategy, user journey design, mobility & accessibility, wayfinding, transit & transport design, digital mapping, UI & UX design, branding, brand implementation, typography, infographics and environmental graphics.** I'm also a passionate design consultant and an effective project manager with years of consultancy and client liaison experience working smoothly and collectively with colleagues offering nice tea and coffee.

Please feel free to visit and see my works here -
